Chris Dennett

Developer and maker of digital art installations.

Technical Experience

Desktop applications

Creating Mac / PC Educational software over many years for CGP. Including software for Maths Testing, Video Tutoring, US Assessment Generators, science eDiagrams for smartboards and a Monster maker game.

Web applications

A GCSE Maths Testing website called MathsBuster is by far the biggest web project I've worked on, involving testing, revision and videos for the entire GCSE. Made with AngularJs.

Digital Art Installations

For an overview of recent projects see artfly.io/chris-dennett. I generally use an application called Processing to make installations. I've also used web technologies like ReactJs with SVG and Canvas manipulation and I've recently been experimenting with OpenFrameworks.

Technical skills

Those marked in [square brackets] I consider "Rusty" as I've not used them recently. The ones in italics are quite new to me.

Web technologies:

ReactJS, JavaScript (including ES6), AngularJS, HTML, CSS, HTML Canvas, SVG, WordPress, *Gatsby, GraphQL, Netlify CMS, NodeJS, Markdown, Netlify CMS*

Desktop applications / technologies:

Bitmap Editing: GIMP, [Photoshop]

Vector Editing: Inkscape, [Corel Draw], [Illustrator]

Audio: Audacity

IDEs: VSCode, Webstorm

Software making: Animate, AIR, Advanced Installer, Electron, [Actionscript (using OO programming)].

Hardware: *Raspberry PI, Aurduino*, Makey Makey

Digital art: Processing (using Java), *Python, Open Frameworks*

Version Control: Git, [Subversion], [TFS]
